DIRECTORY OF

ILLINOIS LIMESTONE AND DOLOMITE PRODUCERS

W. L. Busch

This Directory of Illinois Limestone and Dolomite Producers has been assembled to serve as a guide to the many companies and individuals producing crushed stone throughout the state.

The listings indicate where and by whom crushed stone is produced in Illinois, and give, where possible, for each operation the name of the operating company or individual, the mailing address, the name or number of the quarry, and the name of a near-by town. All quarries are listed in the county in which they are situated.

Beginning on page 24 the stone producers are listed alphabetically with the name of the county, or counties, in which they have been active. Although there are no doubt more stone quarry operations in existence than the directory indicates, complete and current information regarding every possible producer at any given time and place is not available. Also some of the operations listed may not be active at the present time.

Production of about 44.8 million tons of crushed and broken stone was reported by commercial quarry operators for 1967. This prepared stone was valued at 63.1 million dollars for an average of $1.41 per ton. Listings in this directory show that 61 counties throughout Illinois had about 300 quarry sites, which were operated by some 160 different producers.

In 1967, 10 Illinois counties—Cook, Will, Kankakee, St. Clair, Livingston, Rock Island, Hardin, Randolph, DuPage, and Montgomery—produced 29.1 million tons of crushed and broken stone, or about 64.9 percent of the state's total stone output. Of the 44.8 million tons of crushed stone produced in 1967, road and building stone consumed 37.8 million tons, 3.9 million tons were used for agstone, and 3.1 million tons were produced for all other purposes.
